

All lectures are at 11:00 a.m. – preceded by a 10:30 a.m. reception

For abstracts and locations, see [ISTeC.ColoState.edu/event\\_calendar.shtml](http://ISTeC.ColoState.edu/event_calendar.shtml)

**January 28**

“Innovations in Teaching Software Development Skills”

**William Pugh**

Professor Emeritus,  
Department of Computer Science,  
University of Maryland

**February 18**

“Advances in High-Performance Computing: The Race to the Top”

**Tarek El-Ghazawi**

Professor of Engineering and Applied Science,  
George Washington University

**March 25**

“The Effect of Contact Lenses on Iris Recognition”

**Kevin Boyer**

Schubmehl-Prein Professor and  
Department Chair,  
Department of Computer Science  
and Engineering,  
University of Notre Dame

**April 22**

“Improved Power Grid Resiliency through Interactive System Control”

**Vijay Vittal**

Ira A. Fulton Chair Professor,  
School of Electrical,  
Computer and Energy Engineering,  
Arizona State University

**April 29**

“Research Challenges in Green Computing, and Some Solutions”

**Ishfaq Ahmad**

Professor of Computer Science  
and Engineering  
University of Texas at Arlington
