

ISTeC (Information Science and Technology Center) Research Advisory Committee
 Retreat on the Scientific and Engineering Foundations of Information Science and
 Technology
 Saturday, May 8, 8:15am to 3:00pm, Lory Student Center

DOSSIER

Name:	H. J. Siegel
Department:	ECE/CS
Email:	HJ@ColoState.edu
Office Tel:	970-491-7982
WWW URL:	www.engr.colostate.edu/~hj
Research Interests (one paragraph): Parallel, Distributed, and Heterogeneous Computing	
Titles of current research projects (funded or not): Total Shipboard Distributed Computing Environments Robust Distributed Computing Systems Power Aware Resource Allocation in Heterogeneous Distributed Computing Systems Cost Constrained Resource Allocation in Heterogeneous Distributed Computing Systems	
Current collaborations inside and outside your department: Tony Maciejewski Ed Chong Pat Burns Mark Ritschard Chuck Anderson	
Breakout sessions you would like to attend at the retreat (please rank order from 1 to 3):	
2	Alternative models of computing
1	Computing and information processing in support of basic science and engineering
3	Dense sensor networks
	Imaging and tracking
	Automatic image, text, and speech recognition for multimodal interfaces and search engines
	Other (Please suggest a title.)

Faculty at CSU whom you would like to see included into your preferred breakout group:
any faculty with good ideas and the ability to articulate them

One optional paragraph you would like other participants to read before the retreat:
If we want CSU to be a world-class institution in information science and technology it is
up to us to make it happen.
